Product Rules

SQS Certified /Assessed Management System

1. Introduction

SQS has established the terms and conditions as well as the rights and obligations in connection with its services (namely auditing, assessment, certification and training) in its Regulations for SQS services and warranty marks.

In the present Product Rules, SQS regulates the specific procedure and the conditions for obtaining and maintaining «Certified Management Systems and Assessed Management Systems» for the following normative basis. The Product Rules rank alongside the Regulations for SQS services and warranty marks.

The management systems listed below that are certified or assessed by SQS are subject to the conditions of implementation of these Rules (subject to change):

Assessment models

EcoEntreprise

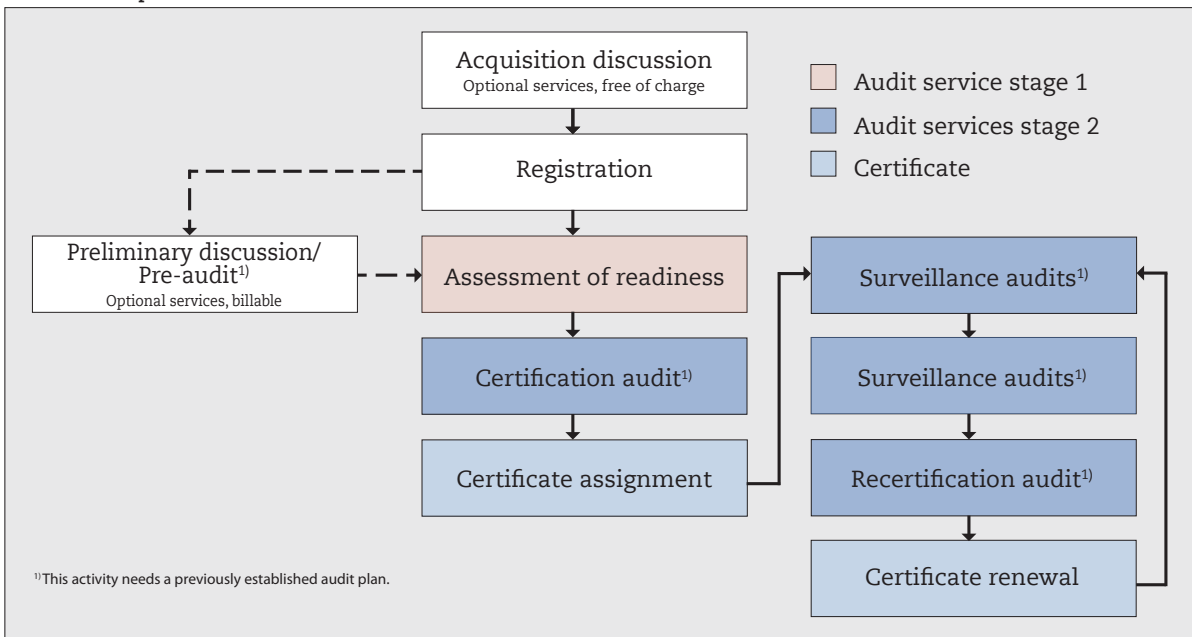

Other certification and assessment services are subject to the Regulations for SQS services and warranty marks and are regulated, where necessary, through additional Product Rules.

Details of the products listed above are shown at www.sqs.ch.

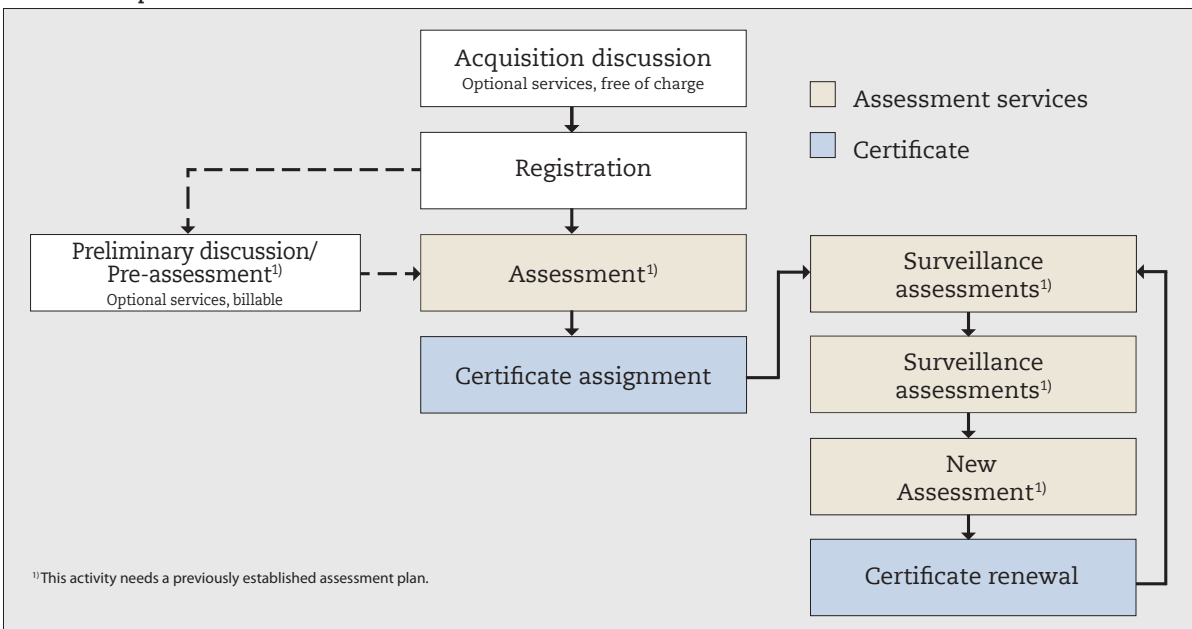

2. Certification and assessment procedures

To check whether the requirements of a «Certified Management System and an Assessed Management System» are met and maintained, SQS carries out the following certification and assessment procedure which include both mandatory and optional additional steps:

Certification process

Assessment procedures

3. Certificate

The decision to award the SQS certificate depends on SQS. The certificate contains the company name, the name and location of the certificate owner, the scope of certification, the field of activity, the normative basis, the validity, the version date and the QR Code.

4. Validity and maintenance

The validity of an «SQS Certified /Assessed Management System» is usually three years. The maintenance of the SQS certificate/the SQS assessment is set out under point 2 of the present Product Rules.

For the products of the BRC and IFS family of standards, specific rules apply to the certificate validity as well as to the certificate maintenance. These are contained in the BRC and IFS standards.

5. Usage of labels

The provisions of the regulations for SQS services and warranty marks apply.

6. Registration

A registration is effected by submitting the registration form to SQS.

7. Additional provisions

The specific requirements of the applicable product-specific normative basis apply.
