ISO 3834-3:2021 in combination with ISO 9001

# Quality requirements for fusion welding of metallic materials

## *Incentive*

The ISO 9001 standard stipulates the regulation of specific processes, such as the welding of components. The specific requirements are defined in the ISO 3834-3 standard. It is suitable for welding operations that make products in regulated and unregulated fields. Certification pursuant to ISO 3834-3 highlights the great significance of welding.

## *Outcome*

ISO 3834-3 supports customer-oriented solutions and optimises process control. It reduces risks and costs.

## *Target groups*

Manufacturers of welded components in regulated and unregulated fields.

## *Validity*

3 years – there is an annual audit to ensure that standards are being maintained and a recertification audit after 3 years.

Swiss Made

MEMBER OF

### *Recognition*

The SQS certificate of conformity with ISO 3834-3 has international validity and is recognised worldwide through the IQNET membership.

### *Combinations*

ISO 3834-3 can be extended to the integrated management system in combination with ISO 9001 (quality management), ISO 14001 (environmental management) and ISO 45001 (Occupational Health and Safety Management).

### *Contact*

Further general information can be obtained from our office in Zollikofen.

Our auditors are also available to answer queries on specific subjects.
